Education evenings 2018

Practical introduction to groundwater modelling

Computer exercises
01 01 General introduction

1

Contents of this short course (1/2)

- ✓ 01 Evening 1
  - 01 General introduction
  - 02 Introduction to ModelMuse
  - 03 Our first MODFLOW model
  - 04 Adding features to our model
- ✓ 02 Evening 2
  - 01 A more complex model
  - 02 Calibrating the more complex model

2

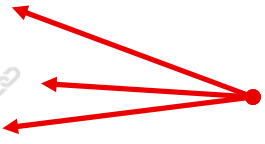
Contents of this short course (2/2)

- ✓ 03 Evening 3
  - 01 RMA example model
  - 02 Particle tracking
  - 03 Solute transport simulation
  - 04 What else?
- ✓ 04 Additional exercises
  - 01 Grid design
  - 02 Troubleshooting exercises
  - 03 MODFLOW LGR

3

Software we will use

- ✓ Pre- and postprocessors
  - ModelMuse
  - ModelMate
  - ModelViewer
  - GW_Chart



Make sure these are installed!
See /00_before-the-course/ !

- ✓ Codes
  - MODFLOW-2005
  - MODFLOW-LGR
  - MODPATH
  - MT3D-USGS
  - UCODE

4

Folder structure (1/2)

/bch_gwmod-2018/ ← Main folder

01_first-session/ ← Subfolder for each session

01-01_general-introduction/

↕ Subfolder for each presentation (and corresponding exercise)

5

Folder structure (1/2)

/bch_gwmod-2018/

00_before-the-course/ ← How to install everything

01_first-session/

02_second-session/ ← When we would have time left…

03_third-session/

04_additional-exercises/

05_software/ ← All required codes and setup files

06_solutions/ ← Example ModelMuse files for all exercises

6

Acknowledgements (1/2)

- ✓ A large part of the exercises is based on training materials generously provided by Richard Winston (USGS), the ModelMuse author.
- ✓ Alberto Casillas (SCK•CEN, UGent) reviewed the exercises of the first edition of this course, and made several suggestions for improvement.

7

Acknowledgements (2/2)

- ✓ All people who have worked on the programs and codes we will be using (you can find their names on the websites). Without them, this practical introduction to groundwater modelling with open source tools would not have been possible today.
