

Education evenings 2016

*Practical introduction
to groundwater modelling*

Computer exercises
00 01 Things to do before the course

Download

- ✓ Course material at
http://tiny.cc/bch_gwmod_2016

Extract

- ✓ Zipped folder

to a location of your choice. Make sure the folder can stay at this location during all three sessions, as we will need to point several programs to the location of executables in the `/bch_gwmod_2016/05_software/` subfolder.

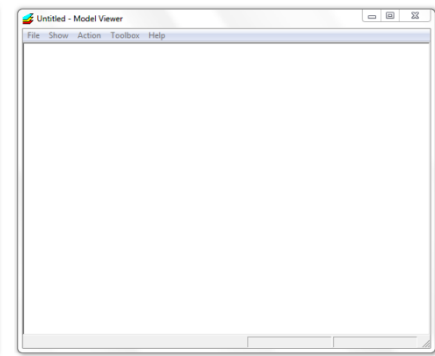

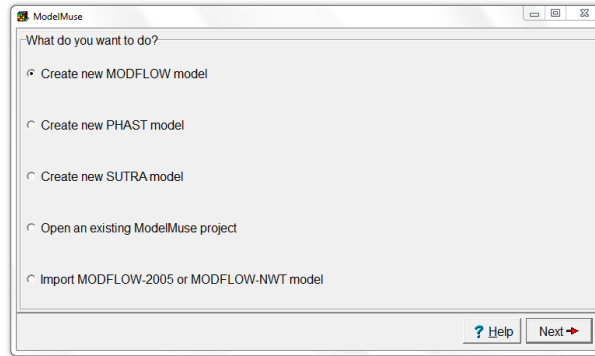

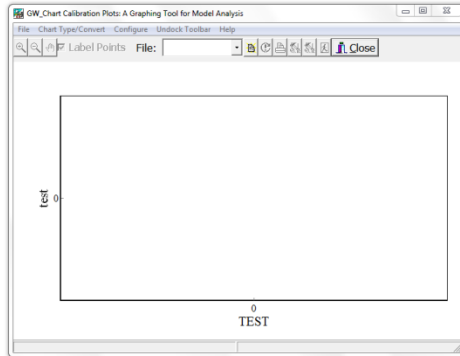

Install

- ✓ GW_Chart
- ✓ ModelMuse
- ✓ ModelViewer

by executing the installers located in the respective subfolders of `/05_software/`, and going through the setup. Make sure you select the correct installer for ModelMuse (32 or 64 bit), based on your machine architecture. The remaining subfolders contain executables that do not need to be installed.

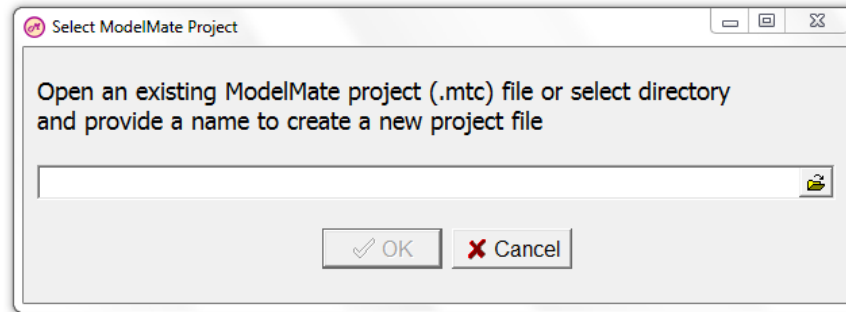

Check

✓ If installation was succesful
by starting GW_Chart, ModelMuse and
ModelViewer. You should get, respectively, the
following starting screens:

Also check

- ✓ If ModelMate works correctly
by executing /05_software/ModelMate/
ModelMate_1_0_2.exe. You should get the
following start screen:

You might want to

- ✓ Add a shortcut to the /bch_gwmod_2016/ folder on your desktop
- ✓ Add shortcuts to GW_Chart, ModelMuse and ModelViewer on your desktop
- ✓ Add a shortcut to ModelMate_1_0_2.exe on your desktop
